

Heterogeneous Systems (E9)

The research team of “Heterogeneous Systems” is a well-shaped team around a strong leadership, with a clear view of the present and the prospective future, at international standards.

The infrastructure is up-to-date, the laboratories are well-equipped for purpose and the quality of work is very good.

The young people are well motivated, with stages in international laboratories, which make them valuable assets. The process of hiring continues, showing that the team works on research programmes of high potential.

The team attracts important EU funds in various programmes, indicating it is included in a strong international network of European laboratories.

The scientific production of the research team is impressive, the papers are submitted to highly ranked journals and this, together with the capital of young people, secures a solid future to the team.

We rate the performance of the research team as “**excellent**”.
